## **DETAILED ACTION**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

The prior art teaches a plurality of cells in a matrix where each of the cells include a base portion that are aligned in columns with other bases and each of the bases are aligned end to end, and where the base has a protrusion that protrudes out from the bases in a perpendicular direction from the base. The prior art does not teach the above teachings in combination with a photo resist layer on top of the base portions extending through the columns of the matrix cells and not on the protrusions that protrude out from the bases.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 1-25 are allowed.

### ***Conclusion***
